

Society for Pediatric **Interventional** Radiology

7th International Meeting October 2 - 4, 2019 Amsterdam

The scientific program will feature diverse pediatric interventional radiology topics including interventional oncology, venous interventions, interventional management of vascular anomalies, trauma interventions and neuro-interventional radiology.

This meeting brings a truly multidisciplinary approach to each of these topics, with expert lectures and case-based panel discussions involving both pediatric IRs and clinical specialists. There will be a unique opportunity to share selected difficult and challenging cases with your peers and experts following each session.
